## Profile Summary

I am currently a student of BCA at Veda College. I have been learning web development with React.js for the last 8 months. During this period, I completed several projects using HTML, CSS, and JavaScript, and then I shifted to React.js to explore more in web development journey and also gained some knowledge about Next.js.

Currently, I am building more projects using React.js with Vite and Tailwind CSS to improve my skills and also learning "Python Programming" to go towards the backend of web development.
